

## Ray Files of Bridgelux F90 V10 BXRE-XXX10F0-B-8X Products

FTP links to ray files for Bridgelux F90 V10 BXRE-XXX10F0-B-8X Array products can be found in this document. In order to download the ray files, please click on the link.

### Note:

- The files are based on test of a 3000K 90CRI part at nominal drive current 200mA at 50°C case temperature.
- Customers designing on other color SKUs or at other drive or thermal conditions can use these ray files and adjust the LOP level accordingly in their design software.
- All the ray files are generated with 1M rays (IES and EUL format have 10M rays).
- All the rays are generated on a plane at  $z=0$ , which is at the center of the top surface of light emitting area. For details about where  $z=0$  is aligned, please refer to the two photos at the end of this file, or read radiant source model in ProSource (under alignment tab).
- Please refer to the 3D CAD files of F90 V10 BXRE-XXX10F0-B-8X from Bridgelux website for mechanical details of the product.
